Abstracts

Nutmeg, also known as minced meat, meat fruit, jade fruit, and anesthetic fruit, is an important spice and medicinal plant. The evergreen plants that grow in the tropics are common in Southeast Asia, Australia, and the Caribbean, especially in Indonesia and Grenada. Nutmeg fruit can be made of two common spices: pod nutrient and nutmeg skin, used for seasoning food, dishes, and its nuts can be made of essential oils. Nutmeg contains myristicin, which produces excitement and hallucinogenic effects. Based on the Nutmeg market development status, competitive landscape and development model in different regions of the world, this report is dedicated to providing niche markets, potential risks and comprehensive competitive strategy analysis in different fields. From the competitive advantages of different types of products and services, the development opportunities and consumption characteristics and structure analysis of the downstream application fields are all analyzed in detail. To Boost Growth during the epidemic era, this report analyzes in detail for the potential risks and opportunities which can be focused on.

In Chapter 2.4 of the report, we share our perspectives for the impact of COVID-19 from the long and short term.

In chapter 3.4, we provide the influence of the crisis on the industry chain, especially for marketing channels.

In chapters 8-13, we update the timely industry economic revitalization plan of the country-wise government.
