Abstracts

The off-grid solar system is completely independent of the grid. This means that for off-grid solar systems, there is no utility company's power as a backup. Typical stand-alone solar systems include solar panels, array DC disconnects, charge controllers, battery banks, system meters, main DC disconnects, inverters, and AC breaker panels. The generator can also be connected to the inverter as a backup power source.

The report combines extensive quantitative analysis and exhaustive qualitative analysis, ranges from a macro overview of the total market size, industry chain, and market dynamics to micro details of segment markets by type, application and region, and, as a result, provides a holistic view of, as well as a deep insight into the Off-grid Solar Power Systems market covering all its essential aspects.
