Abstracts

Subsea equipment is used to explore, develop and bring the produced hydrocarbon from the seabed to the surface. SURF equipment i.e. subsea umbilicals, risers, and flowlines form the vital link during the various stages of oil and gas extraction. These products are manufactured using set standards that are capable of withstanding high mechanical and chemical stress operating under high temperature and pressure. Based on the Oil and Gas Subsea Umbilicals, Risers and Flowlines (SURF) market development status, competitive landscape and development model in different regions of the world, this report is dedicated to providing niche markets, potential risks and comprehensive competitive strategy analysis in different fields. From the competitive advantages of different types of products and services, the development opportunities and consumption characteristics and structure analysis of the downstream application fields are all analyzed in detail. To Boost Growth during the epidemic era, this report analyzes in detail for the potential risks and opportunities which can be focused on.
