Abstracts

Olives are small fruit that grow on olive trees (*Olea europaea*). They belong to a group of fruit called drupes, or stone fruits. They are related to mangoes, cherries, peaches, almonds and pistachios. Olives are very high in vitamin E and other powerful antioxidants. Studies show that they are good for the heart, and may protect against osteoporosis and cancer.

Based on the Olives market development status, competitive landscape and development model in different regions of the world, this report is dedicated to providing niche markets, potential risks and comprehensive competitive strategy analysis in different fields. From the competitive advantages of different types of products and services, the development opportunities and consumption characteristics and structure analysis of the downstream application fields are all analyzed in detail. To Boost Growth during the epidemic era, this report analyzes in detail for the potential risks and opportunities which can be focused on.

In Chapter 2.4 of the report, we share our perspectives for the impact of COVID-19 from the long and short term.

In chapter 3.4, we provide the influence of the crisis on the industry chain, especially for marketing channels.

In chapters 8-13, we update the timely industry economic revitalization plan of the country-wise government.
