Abstracts

An online community software is a kind of software which offer a virtual community whose members interact with each other primarily via the Internet. For many, online communities may feel like home, consisting of a 'family of invisible friends'. Those who wish to be a part of an online community usually have to become a member via a specific site and necessarily need an internet connection.

Based on the Online Community Software market development status, competitive landscape and development model in different regions of the world, this report is dedicated to providing niche markets, potential risks and comprehensive competitive strategy analysis in different fields. From the competitive advantages of different types of products and services, the development opportunities and consumption characteristics and structure analysis of the downstream application fields are all analyzed in detail. To Boost Growth during the epidemic era, this report analyzes in detail for the potential risks and opportunities which can be focused on.

In Chapter 2.4 of the report, we share our perspectives for the impact of COVID-19 from the long and short term.

In chapter 3.4, we provide the influence of the crisis on the industry chain, especially for marketing channels.

In chapters 8-13, we update the timely industry economic revitalization plan of the country-wise government.
