## Abstracts

If your small business has employees, the main concern is to ensure that they receive timely and accurate compensation. Online payroll service allows you to manage your payroll yourself without having to hire a third party service

With the online payroll service, you can quickly extract information or perform calculations

Once you set up your online system, it only takes a few minutes to start the payroll.

Your main task is to simply enter the number of hours each employee works each week and the system will do the rest.

Online payroll eliminates the need to hire an external payroll service or assign tasks to your employees, which helps reduce costs. By performing weekly updates yourself, you can reduce labor costs while saving little time from other features. As a business owner, any way to reduce costs can have a major impact on your profits.

The online payroll system allows you to manage payrolls at your convenience. If necessary, you can enter information at the last minute before you need to meet the payroll. You can also get information at any time without waiting for a third party to answer any questions.

Manual payroll systems typically require at least one person to export or manually calculate time and attendance information, calculate tax and benefit withholding taxes, prepare salaries, and submit forms to the IRS. This process can take several hours and must be completed during each payment period. Typically, online payroll services automatically perform these tasks, or, with approval, take only a few seconds and a few clicks.

Based on the Online Payroll Services market development status, competitive landscape and development model in different regions of the world, this report is dedicated to providing niche markets, potential risks and comprehensive competitive

strategy analysis in different fields. From the competitive advantages of different types of products and services, the development opportunities and consumption characteristics and structure analysis of the downstream application fields are all analyzed in detail. To Boost Growth during the epidemic era, this report analyzes in detail for the potential risks and opportunities which can be focused on.

In Chapter 2.4 of the report, we share our perspectives for the impact of COVID-19 from the long and short term.

In chapter 3.4, we provide the influence of the crisis on the industry chain, especially for marketing channels.

In chapters 8-13, we update the timely industry economic revitalization plan of the country-wise government.
