## **Abstracts**

Integrated operating rooms are designed to lessen the complexity of the most intricate environments inside a hospital, a private clinic, or a medical institute. Modern integrated operating rooms are equipped with a wide range of surgical equipment along with equipment management systems, medical printers, insufflation devices, surgical microscopes, surgical lights, cameras, large screen displays, and air management devices. An operating room integration system not only integrates equipment, but also functionally connects the operating room environment that includes patient information system, audio, video, surgical lights, operating tables, and building automation. When all these technologies are integrated, the various equipment are controlled by a single operator that may be a physician or a nurse.

The Operating Room Integrated Systems market revenue was xx Million USD in 2016, grew to xx Million USD in 2020, and will reach xx Million USD in 2026, with a CAGR of xx during 2020-2026.
