## Abstracts

Organic wine is wine made from grapes grown in accordance with principles of organic farming, which typically excludes the use of artificial chemical fertilizers, pesticides, fungicides and herbicides. Organic grapes are cultivated in vineyards on the principles of organic farming. The aging process is employed to lend the wine, obtained from the grapes, a fine taste. It is the most preferred alcoholic beverage among the consumers. Organic wine can be used as a medicine due to presence of resveratrol that prevents aging and helps to fight with the diseases.

Based on the Organic Wine market development status, competitive landscape and development model in different regions of the world, this report is dedicated to providing niche markets, potential risks and comprehensive competitive strategy analysis in different fields. From the competitive advantages of different types of products and services, the development opportunities and consumption characteristics and structure analysis of the downstream application fields are all analyzed in detail. To Boost Growth during the epidemic era, this report analyzes in detail for the potential risks and opportunities which can be focused on.
