## Abstracts

In the recent years, outboard motor technology has advanced to the point where outboard engines are fuel efficient, more reliable, and weigh less as compared to the models of the past. In order to enhance the boating experience, manufacturers are moving towards combining the right boat powered by the best outboard engine. Instead of choosing the size of the outboard as per the manufacturers maximum allowed capacity, some of the customers are also going for the smaller outboard engine, especially in the case of shallow drafts. The weight of the outboard engine is also being considered by customers along with the hull design and draft, as they all affect the overall performance of the boat.
