Abstracts

P2P represents point-to-point. Peer-to-peer car sharing (sometimes called distributed car sharing, neighbor car sharing or car 2.0) is a new kind of car sharing mode. In this mode, the co-owners will rent their private cars to the community in a minute or an hour, and at the same time provide services to the community from their cars. Make money. P2P service providers provide remote information processing solutions and keyless vehicle access technology, allowing easy vehicle exchange between owners and tenants.

Based on the P2P Carsharing market development status, competitive landscape and development model in different regions of the world, this report is dedicated to providing niche markets, potential risks and comprehensive competitive strategy analysis in different fields. From the competitive advantages of different types of products and services, the development opportunities and consumption characteristics and structure analysis of the downstream application fields are all analyzed in detail. To Boost Growth during the epidemic era, this report analyzes in detail for the potential risks and opportunities which can be focused on.

In Chapter 2.4 of the report, we share our perspectives for the impact of COVID-19 from the long and short term.

In chapter 3.4, we provide the influence of the crisis on the industry chain, especially for marketing channels.

In chapters 8-13, we update the timely industry economic revitalization plan of the country-wise government.
