Abstracts

P2P Payments is the online technology that allows customers to transfer funds from their bank account or credit card to another individual's account via the Internet. It is based on the successful Paypal approach where customers establish secure connection of accounts with a trusted third-party vendor, designating their bank account or credit card information for transferring and accepting funds. An alternative approach is where customers use an online interface or mobile application to assign the amount of funds to be transferred.

Based on the P2P Payments market development status, competitive landscape and development model in different regions of the world, this report is dedicated to providing niche markets, potential risks and comprehensive competitive strategy analysis in different fields. From the competitive advantages of different types of products and services, the development opportunities and consumption characteristics and structure analysis of the downstream application fields are all analyzed in detail. To Boost Growth during the epidemic era, this report analyzes in detail for the potential risks and opportunities which can be focused on.

In Chapter 2.4 of the report, we share our perspectives for the impact of COVID-19 from the long and short term.

In chapter 3.4, we provide the influence of the crisis on the industry chain, especially for marketing channels.
