Abstracts

Chia is the edible seed of *Salvia hispanica*, a flowering plant in the mint family (Lamiaceae) native to Central America, or of the related *Salvia columbariae* of the southwestern United States and Mexico. Chia seeds are oval and gray with black and white spots, having a diameter around 1 millimetre (0.04 in). The seeds are hydrophilic, absorbing up to 12 times their weight in liquid when soaked and developing a mucilaginous coating that gives chia-based creams and beverages a distinctive gel texture. Chia seeds on average contain 6% water, 42% carbohydrates, 16% protein, and 31% fat. The fatty acids in chia seeds are highly unsaturated, with the major fats being linolenic acid (50–57% of total fat) and linoleic acid (17–26%). The seeds are rich in omega-3 fatty acids and the B vitamins thiamin and niacin.

Based on the Packaged Chia Seeds market development status, competitive landscape and development model in different regions of the world, this report is dedicated to providing niche markets, potential risks and comprehensive competitive strategy analysis in different fields. From the competitive advantages of different types of products and services, the development opportunities and consumption characteristics and structure analysis of the downstream application fields are all analyzed in detail. To Boost Growth during the epidemic era, this report analyzes in detail for the potential risks and opportunities which can be focused on.
