Abstracts

Passenger tyres are for vehicles that are designed for personal use – like hatchbacks, sedans, coupes, and crossovers. Many SUVs, minivans, and smaller pickup trucks (under 2 ton) also use passenger-rated tires.

The most significant difference between 4x4 tyres and standard is their purpose and versatility. Standard car tyres were designed to suit the tarmac roads that we see every day by maintaining traction. 4x4 tyres differentiate from normal tyres by priming their design for off-road conditions such as snow, grass, dirt and mud.

The report combines extensive quantitative analysis and exhaustive qualitative analysis, ranges from a macro overview of the total market size, industry chain, and market dynamics to micro details of segment markets by type, application and region, and, as a result, provides a holistic view of, as well as a deep insight into the Passenger and 4x4 Tyres market covering all its essential aspects.
