Abstracts

Peanut is one of the most important legume grown in warmer regions such as Asia, Africa, Australia and in The Americas. Peanuts are rich in large number of nutrients such as biotin, copper, manganese, phosphorus, a variety of vitamins and proteins etc. Peanut flour is obtained by crushing peanuts, they are processed to obtain flour with a lower fat content. Peanut flour, after removing the fat content has high amount of protein. The demand for plant based ingredients which also includes of peanut flour is increasing due to consumers demand for healthier food products and cleaner label requirements. Peanut flour is gluten-free and has been considered to be beneficial for heart health. It is used as an alternative flour to make gluten free breads and other bakery products, it is also used as a thickener, flavoring agent, topping for meat and seafood and as an ingredient in smoothies to increase the protein content.

Based on the Peanut market development status, competitive landscape and development model in different regions of the world, this report is dedicated to providing niche markets, potential risks and comprehensive competitive strategy analysis in different fields. From the competitive advantages of different types of products and services, the development opportunities and consumption characteristics and structure analysis of the downstream application fields are all analyzed in detail. To Boost Growth during the epidemic era, this report analyzes in detail for the potential risks and opportunities which can be focused on.
