Abstracts

Pet food is plant or animal material intended for consumption by pets. Typically sold in pet stores and supermarkets, it is usually specific to the type of animal, such as dog food or cat food. Most meat used for nonhuman animals is a byproduct of the human food industry, and is not regarded as 'human grade'.

Pet product parents, as a group, have specific and sometimes urgent concerns. Inland's packaging options are made to order. Consumers now spend more time interacting with your packaging. Purchase decisions made at retail are less automatic and more thoughtful, especially when pets have special dietary needs.
