Abstracts

Phthalocyanine Pigments are one of the most widely used organic pigments which find their extensive utilization in the various industries including textile, paper, plastic, etc. Phthalocyanine possess intense blue-green color and also form coordination complex with almost all elements of the periodic table, which are further used as pigments or dyes. Apart from its usage as pigments, Phthalocyanine have also been examined for its use as catalysts for redox reaction. The Phthalocyanine pigments belong to the Azo Phthalocyanine groups and possess excellent dispersion and rheological characteristics. Due to this, they are highly recommended for superior quality printing inks with good gloss and tone.
