Abstracts

Hot Melt Adhesives are composed of solvent free compounds which are used to develop a strong and flexible bond between the materials. They are found as solids at room temperature and are thermoplastic in nature. These adhesives are first melt, cooled and then applied on the surface to give the perfect finish. Hot Melt Adhesives also provide good thermal stability and resistance, environmental compatibility, as well as efficient, and safe storage. Polyolefin Elastomer-based Hot Melted Adhesive is a kind of hot melted adhesive based on the component of polyolefin elastomer.
