Abstracts

Electric wheelchairs are also called as power chairs or powered wheelchairs. They do not require any human assistance for mobility as they are powered by a battery. The most obvious advantage of electric wheelchair is that they are user-friendly and convenient. These electric wheelchairs are useful for those unable to use a manual wheelchair or who may want to use a wheelchair for traveling a long distance and in such case using a manual wheelchair is very difficult. Apart from people with a traditional mobility disability, they may also be used by people with cardiovascular diseases or who met with any accidental conditions.

Based on the Powered Wheelchairs market development status, competitive landscape and development model in different regions of the world, this report is dedicated to providing niche markets, potential risks and comprehensive competitive strategy analysis in different fields. From the competitive advantages of different types of products and services, the development opportunities and consumption characteristics and structure analysis of the downstream application fields are all analyzed in detail. To Boost Growth during the epidemic era, this report analyzes in detail for the potential risks and opportunities which can be focused on.

In Chapter 2.4 of the report, we share our perspectives for the impact of COVID-19 from the long and short term.
