## Abstracts

Preserved Fresh flowers and foliage are natural flowers and greens that have been processed with a revolutionary technology to maintain their fresh appearance for several months or even years. Their beauty and soft delicate appearance makes it difficult to differentiate between cut flowers and the fresh look of our products. Based on the Preserved Fresh Flower market development status, competitive landscape and development model in different regions of the world, this report is dedicated to providing niche markets, potential risks and comprehensive competitive strategy analysis in different fields. From the competitive advantages of different types of products and services, the development opportunities and consumption characteristics and structure analysis of the downstream application fields are all analyzed in detail. To Boost Growth during the epidemic era, this report analyzes in detail for the potential risks and opportunities which can be focused on.

In Chapter 2.4 of the report, we share our perspectives for the impact of COVID-19 from the long and short term.

In chapter 3.4, we provide the influence of the crisis on the industry chain, especially for marketing channels.

In chapters 8-13, we update the timely industry economic revitalization plan of the country-wise government.
