## Abstracts

Preventive healthcare is the use of recognized active health checks, counseling and maintenance to prevent future illnesses and treatments. Preventive care is also known as preventive medicine or prevention. Preventive care includes measures taken to address disease aversion rather than disease treatment. Preventive health measures focus on preventable diseases, injuries and patient diseases that can be detected early to save patients with this disease.

Based on the Preventive Healthcare market development status, competitive landscape and development model in different regions of the world, this report is dedicated to providing niche markets, potential risks and comprehensive competitive strategy analysis in different fields. From the competitive advantages of different types of products and services, the development opportunities and consumption characteristics and structure analysis of the downstream application fields are all analyzed in detail. To Boost Growth during the epidemic era, this report analyzes in detail for the potential risks and opportunities which can be focused on.

In Chapter 2.4 of the report, we share our perspectives for the impact of COVID-19 from the long and short term.
