Abstracts

Professional Service Automation is a piece of software designed to help professionals (such as lawyers, auditors, and IT consultants) provide project management and resource management for customer projects and provide utilization management for billable employees. This is achieved by developing metrics to quantify and identify basic business processes that can then be used to streamline and improve these processes. Based on the Professional Services Automation market development status, competitive landscape and development model in different regions of the world, this report is dedicated to providing niche markets, potential risks and comprehensive competitive strategy analysis in different fields. From the competitive advantages of different types of products and services, the development opportunities and consumption characteristics and structure analysis of the downstream application fields are all analyzed in detail. To Boost Growth during the epidemic era, this report analyzes in detail for the potential risks and opportunities which can be focused on.

In Chapter 2.4 of the report, we share our perspectives for the impact of COVID-19 from the long and short term.

In chapter 3.4, we provide the influence of the crisis on the industry chain, especially for marketing channels.
