## Abstracts

Value-added snacks containing protein, claimed to provide added protein from animal sources such as meat, fish, poultry or plant sources such as lentils and protein-rich seeds, classified as protein snacks. The market's demand for this enhanced or functional snack choice is a trend among global consumers, especially among urban residents, because their busy lifestyles do not provide adequate nutrient intake through traditional eating habits.

Based on the Protein Snack market development status, competitive landscape and development model in different regions of the world, this report is dedicated to providing niche markets, potential risks and comprehensive competitive strategy analysis in different fields. From the competitive advantages of different types of products and services, the development opportunities and consumption characteristics and structure analysis of the downstream application fields are all analyzed in detail. To Boost Growth during the epidemic era, this report analyzes in detail for the potential risks and opportunities which can be focused on.

In Chapter 2.4 of the report, we share our perspectives for the impact of COVID-19 from the long and short term.

In chapter 3.4, we provide the influence of the crisis on the industry chain, especially for marketing channels.

In chapters 8-13, we update the timely industry economic revitalization plan of the country-wise government.
