Emergency management and federal, state, and local security under the current environment requires a coordinated and timely response. The ability of the authorities to communicate in real time is critical to establishing command and control at the scene of an emergency, to maintaining event situational awareness, and to be able to operate within a broad range of incidents. Wireless communications (including radio communications) is the most effective way of transmitting and receiving information in any emergency situation where the affected area may not have the infrastructure in place to serve first responders, or where such infrastructure may have been destroyed because of the event itself.
