## Abstracts

Pulses are basically legumes that are found in all the agricultural nations of the world. Pulse flour is basically milled, dried pulses, which are refined further for using them in different applications. Pulse flour can be used as a substitute for traditional flour like wheat, soy, etc. Some of the popular pulses used for making pulse flour include lentils, broad beans, yellow peas, and beans, among others.

Based on the Pulse Flours market development status, competitive landscape and development model in different regions of the world, this report is dedicated to providing niche markets, potential risks and comprehensive competitive strategy analysis in different fields. From the competitive advantages of different types of products and services, the development opportunities and consumption characteristics and structure analysis of the downstream application fields are all analyzed in detail. To Boost Growth during the epidemic era, this report analyzes in detail for the potential risks and opportunities which can be focused on.

In Chapter 2.4 of the report, we share our perspectives for the impact of COVID-19 from the long and short term.

In chapter 3.4, we provide the influence of the crisis on the industry chain, especially for marketing channels.

In chapters 8-13, we update the timely industry economic revitalization plan of the country-wise government.
