Abstracts

Railcar lessors purchase railcars or rolling stock at a competitive price from the rolling stock manufacturers and lease them to public and private railroad players and shippers in various industries, such as chemical and plastics, petroleum refineries, and food and agricultural. This is done at a lease rate for a lease period, which varies from 2-5 years or even 20 years, depending on the types of lease. At the end of the lease, the railcar lessors will maximize the value of the railcar by selling or scrapping at a suitable time.
