Abstracts

A CMA is a detailed report prepared by a real estate license holder that is used to come up with an estimated price for any property. The calculations are based on the information you collect from recently sold, active, and expired listings of similar properties, in similar areas. The next step would be to compare the calculated average market price to the price of the property in question to determine the price of the property to list.

CMA software (comparative market analysis) allows real estate agents to quickly and easily create data-rich CMA and list presentations.

Based on the Real Estate CMA Software market development status, competitive landscape and development model in different regions of the world, this report is dedicated to providing niche markets, potential risks and comprehensive competitive strategy analysis in different fields. From the competitive advantages of different types of products and services, the development opportunities and consumption characteristics and structure analysis of the downstream application fields are all analyzed in detail. To Boost Growth during the epidemic era, this report analyzes in detail for the potential risks and opportunities which can be focused on.

In Chapter 2.4 of the report, we share our perspectives for the impact of COVID-19 from the long and short term.

In chapter 3.4, we provide the influence of the crisis on the industry chain, especially for marketing channels.

In chapters 8-13, we update the timely industry economic revitalization plan of the country-wise government.
