## Abstracts

A release agent, also known as a mold release agent, release coating, and mold release coating, is a chemical used to prevent other materials from bonding to surfaces. Release agents are an integral part of many manufacturing processes, as they usually are used to enhance productivity, extend tool/die/mold life, increase cycle times, improve the part/surface quality and reduce scrap and defect rates.

Based on the Release Agents market development status, competitive landscape and development model in different regions of the world, this report is dedicated to providing niche markets, potential risks and comprehensive competitive strategy analysis in different fields. From the competitive advantages of different types of products and services, the development opportunities and consumption characteristics and structure analysis of the downstream application fields are all analyzed in detail. To Boost Growth during the epidemic era, this report analyzes in detail for the potential risks and opportunities which can be focused on.

In Chapter 2.4 of the report, we share our perspectives for the impact of COVID-19 from the long and short term.

In chapter 3.4, we provide the influence of the crisis on the industry chain, especially for marketing channels.

In chapters 8-13, we update the timely industry economic revitalization plan of the country-wise government.
