Abstracts

Rent-to-own, is a type of legally documented transaction under which tangible property, such as furniture, consumer electronics, motor vehicles, home appliances, real property, and engagement rings, is leased in exchange for a weekly or monthly payment, with the option to purchase at some point during the agreement. A rent-to-own transaction differs from a traditional lease, in that the lessee can purchase the leased item at any time during the agreement (in a traditional lease the lessee has no such right), and from a hire purchase/installment plan, in that the lessee can terminate the agreement by simply returning the property (in a hire purchase the buyer has a limited time, if any, to cancel the agreement).

The report combines extensive quantitative analysis and exhaustive qualitative analysis, ranges from a macro overview of the total market size, industry chain, and market dynamics to micro details of segment markets by type, application and region, and, as a result, provides a holistic view of, as well as a deep insight into the Rent-to-Own market covering all its essential aspects.
