Abstracts

Desiccant dehumidifiers utilize chemical attraction instead of condensation to remove water from the air.

Because they do not use condensation, they are not limited by low dew point temperatures, and when used properly, they produce the lowest vapor pressure of any dehumidifier.

Keeping in view their smaller size, desiccant dehumidifiers are a good fit in smaller spaces, such as closets, bathrooms, and kitchens. Moreover, they are much quieter in comparison to compressor-based models. So, if you get annoyed by high noise levels, desiccant dehumidifiers might serve you well.

If you like your environment green and healthy, a desiccant dehumidifier might be the answer to your concerns since it does not use any harmful refrigerants used in compressor-based models.
