Abstracts

Logistics is a process of planning, implementing, and controlling the operations of the supply chain activities to look upon the customer needs more efficiently. It involves planning and management of all activities involved in sourcing and procurement and in conversion of final products. The use of logistics in the Retail industry has led to low fulfillment costs, shorter delivery times, and enhanced ability to focus on service delivery rather than on administrative processes.

Based on the Retail Logistics market development status, competitive landscape and development model in different regions of the world, this report is dedicated to providing niche markets, potential risks and comprehensive competitive strategy analysis in different fields. From the competitive advantages of different types of products and services, the development opportunities and consumption characteristics and structure analysis of the downstream application fields are all analyzed in detail. To Boost Growth during the epidemic era, this report analyzes in detail for the potential risks and opportunities which can be focused on.

In Chapter 2.4 of the report, we share our perspectives for the impact of COVID-19 from the long and short term.

In chapter 3.4, we provide the influence of the crisis on the industry chain, especially for marketing channels.

In chapters 8-13, we update the timely industry economic revitalization plan of the country-wise government.
