Abstracts

Robo-advisory is basically an automated, algorithm based portfolio management service offered by wealth management companies. It significantly decreases management cost involved in providing all the financial advice through manpower, thus assisting wealth management companies to provide this as a minimal cost service for their customers. Robo advisory is an automated portfolio management software, which allows the customers to consistently adjust and customize the online investment in order to meet their long-term financial goals and short-term investment strategy.

Based on the Robo Advice market development status, competitive landscape and development model in different regions of the world, this report is dedicated to providing niche markets, potential risks and comprehensive competitive strategy analysis in different fields. From the competitive advantages of different types of products and services, the development opportunities and consumption characteristics and structure analysis of the downstream application fields are all analyzed in detail. To Boost Growth during the epidemic era, this report analyzes in detail for the potential risks and opportunities which can be focused on.

In Chapter 2.4 of the report, we share our perspectives for the impact of COVID-19 from the long and short term.

In chapter 3.4, we provide the influence of the crisis on the industry chain, especially for marketing channels.
