Abstracts

Salmo platycephalus, known as the flathead trout, Ala balik or the Turkish trout, is a type of trout, a fish in the Salmonidae family. It is endemic to south-eastern Turkey. It is known only from one population, which occupies three streams, tributaries of the Zamant? River in the Seyhan River basin. The population itself is abundant, but subject to threat by habitat loss, since the range is small. Also, predation of juveniles by introduced rainbow trout may cause population decline. The species is classified as critically endangered.
