Abstracts

Sandwich Panel (sometimes called composite panel or structural insulation panel) is composed of two layers of rigid materials, which are bonded to both sides of light core material. These three components together as a compound; That is, the combination of component features produces better performance than when they run alone. The lightweight core holds the two faces in the correct position, resists shear forces and provides insulation, while the two faces provide durability, weather ability and impact resistance, and resist tension and pressure in the plane. Sandwich Panel can be divided into EPS Sandwich Panel, PUR/PIR Sandwich Panel, Mineral Wool Sandwich Panel, PF Sandwich Panels, etc. Sandwich Panel System is widely used in various architectural constructions as roof, wall, etc.

The report combines extensive quantitative analysis and exhaustive qualitative analysis, ranges from a macro overview of the total market size, industry chain, and market dynamics to micro details of segment markets by type, application and region, and, as a result, provides a holistic view of, as well as a deep insight into the Sandwich Panel market covering all its essential aspects.
