Abstracts

The Microwave & RF Solid State Power Amplifier (SSPA) product line was designed for use in the most demanding applications, including Airborne, Missile, Radars and Communications. The RF input to the solid state power amplifier, is pre-amplified and split into several parallel symmetric branches. Each branch includes a power amplifier section (PA). A compact and highly efficient switching Power Supply Unit (PSU) is built into the solid state power amplifier. This state-of-the-art PSU design ensures that any contribution of phase noise and spurious signals are significantly reduced at the RF output. Most all solid state power amplifier designs are custom deriving from Customer specifications because of the differing requirements for specific applications such as Airborne Radars and Missile Seekers.
