Abstracts

Semolina is a very gritty, coarse type of flour, usually made from wheat however the term is also applied to maize. It contains the nutritious heart (endosperm) of the grain, which is left behind during milling when the finer flour is sifted. IN THE KITCHEN In Britain semolina is traditionally (and sometimes derisively) associated with baked milk puddings and school dinners, however there are many more exotic ways to use it.

Based on the Semolina market development status, competitive landscape and development model in different regions of the world, this report is dedicated to providing niche markets, potential risks and comprehensive competitive strategy analysis in different fields. From the competitive advantages of different types of products and services, the development opportunities and consumption characteristics and structure analysis of the downstream application fields are all analyzed in detail. To Boost Growth during the epidemic era, this report analyzes in detail for the potential risks and opportunities which can be focused on.

In Chapter 2.4 of the report, we share our perspectives for the impact of COVID-19 from the long and short term.
