## Abstracts

The sewage pump is mainly used to transport urban sewage, feces or liquids containing solid particles such as fibers and paper dust, and the temperature of the medium to be transported is usually not more than 80 °C. Because the medium being conveyed contains fibers that are easily entangled or bunched. Therefore, the pump flow path is prone to blockage, and once the pump is blocked, the pump can not work normally, or even burn the motor, thereby causing poor drainage.
