Abstracts

The standout feature of any shaker bottle is a mixing mechanism that works to break up and blend ingredients into a smooth liquid shake. Even the mixing mechanism can be called many different things—whisk ball, shaker ball, mixer ball, or agitator, etc. these bottles are handy when people are at the gym, at work, or otherwise on the go, so they are a convenient way to make the drink. These bottles often have a sip top lid, which helps users to drink the shake without spilling it.
