Abstracts

Silver powders and flakes are white powders with metal luster, and are face-centered cubic structure. They are excellent conductors of heat and electricity. Silver powders and flakes are inert for most acid, but could be quickly dissolved in dilute nitric acid and hot concentrated sulfuric acid. Silver powder and flakes are used by converting it to conductive pastes and adhesives. The high conductivity of silver in the ink form maximize its performance. Silver powder and flakes is largely used in the electronics industry. These powders are also used in adhesives and sealants.
