Abstracts

Smart parking lock is a parking lock that can be connected with various devices. For example, it can be connected with charging pile, computer, mobile APP, WeChat applet and so on. Its role is to prevent others from occupying their own car berths, so that their cars can be stopped at any time, and they can also rent out the parking spaces without using the parking locks. The development of this parking lock is to solve the problem that the common remote parking lock cannot realize the shared parking space. Based on the Smart Parking Spot Lock market development status, competitive landscape and development model in different regions of the world, this report is dedicated to providing niche markets, potential risks and comprehensive competitive strategy analysis in different fields. From the competitive advantages of different types of products and services, the development opportunities and consumption characteristics and structure analysis of the downstream application fields are all analyzed in detail. To Boost Growth during the epidemic era, this report analyzes in detail for the potential risks and opportunities which can be focused on.
