## Abstracts

Snow chains, also known as tire chains, are a type of chain mounted on a wheel that allows the vehicle to remain gripped without slipping when driving on snow or icy roads. The snow chain is mounted on the drive wheels of the vehicle and is installed on both the left and right sides. Since the snow chain can be installed, it may increase fuel consumption and the speed cannot exceed 50 kilometers per hour. Therefore, it is used for vehicles that are not regularly entering snow or icy roads.
