Social BI, or Social Business Intelligence, refers to the creation, publishing and sharing of custom business analytics reports and dashboards by end users of Cloud technologies.

Social or collaborative BI is the use of Enterprise 2.0 tools and practices with business intelligence outputs for the purpose of making collective decisions. First enabled by the rapid growth of social media networks in 2009, Social BI allows for the collaborative development of post user-generated analytics among business analysts and data mining professionals. This has removed previous barriers to self-service BI while still employing traditional analytics applications.
