Abstracts

Social BI, or Social Business Intelligence, refers to the creation, publishing and sharing of custom business analytics reports and dashboards by end users of Cloud technologies.

Social or collaborative BI is the use of Enterprise 2.0 tools and practices with business intelligence outputs for the purpose of making collective decisions. First enabled by the rapid growth of social media networks in 2009, Social BI allows for the collaborative development of post user-generated analytics among business analysts and data mining professionals. This has removed previous barriers to self-service BI while still employing traditional analytics applications.

Based on the Social Business Intelligence market development status, competitive landscape and development model in different regions of the world, this report is dedicated to providing niche markets, potential risks and comprehensive competitive strategy analysis in different fields. From the competitive advantages of different types of products and services, the development opportunities and consumption characteristics and structure analysis of the downstream application fields are all analyzed in detail. To Boost Growth during the epidemic era, this report analyzes in detail for the potential risks and opportunities which can be focused on.

In Chapter 2.4 of the report, we share our perspectives for the impact of COVID-19 from the long and short term.

In chapter 3.4, we provide the influence of the crisis on the industry chain, especially for marketing channels.

In chapters 8-13, we update the timely industry economic revitalization plan of the country-wise government.
