Abstracts

Specialty malts are any malts other than standard malt. They are basically produced by manipulating the process of drying. Specialty malts provide exclusive characteristics that make craft beer with improved features like increased color and flavor, extended shelf life of a product, improved taste, rise in foam and foam retention, and ultimately the brewing performance.

Based on the Specialty Barley Malt market development status, competitive landscape and development model in different regions of the world, this report is dedicated to providing niche markets, potential risks and comprehensive competitive strategy analysis in different fields. From the competitive advantages of different types of products and services, the development opportunities and consumption characteristics and structure analysis of the downstream application fields are all analyzed in detail. To Boost Growth during the epidemic era, this report analyzes in detail for the potential risks and opportunities which can be focused on.

In Chapter 2.4 of the report, we share our perspectives for the impact of COVID-19 from the long and short term.

In chapter 3.4, we provide the influence of the crisis on the industry chain, especially for marketing channels.
