## Abstracts

The specific pathogen free animals is a term that is especially used for the animals that are free from pathogens and are used in the laboratory for testing purposes. These animals are kept in a highly monitored environment so that they are not infected by any type of pathogens. These animals are kept in controlled lab conditions so that they stay away from any type of infection. After these specific pathogen free animals are brought out of their bio-secure facility, they lose their status of being specific pathogen free animals.
