Abstracts

A spice is a seed, fruit, root, bark, or other plant substance primarily used for flavoring or coloring food. Every other part of the plant, including dried bark, roots, berries, seeds, twigs, or anything else that isn't the green leafy part, is considered a spice. Spices are dry aromatic and pungent ingredients used to enhance taste and nutritional value of food. Some spices are also used for coloring or preserving food items, for example, turmeric is used as an antiseptic. Generally, spices used in food item are typically in dried form which leads to longest shelf life. In addition, the role of spices is to increase the palatability and used as a flavoring, coloring, and preservative agents. Rather than cooking spices is the part of many industry like medical, cosmetic, pharmaceutical and perfumery, and many more. Spices not only improve the taste of food but also a good source of vitamins B and C, iron, calcium, and other antioxidants. At present, spices play a vital role in Indian cuisine since long time. These are the some of the most valuable items of domestic as well as industrial kitchens. They even created the Indian Institute of Spices Research devoted to the study of spices.
