Abstracts

Stevia is an herbaceous perennial plant of the Asteraceae family. Stevia is a nutrient rich natural sweetest plant. The leaves naturally contain dulcoside, rebaudiosides A-F, diterpene glycosides stevioside, and steviolbioside which are responsible for its sweet taste. It is a plant which offers sweetness with fewer calories and do not show any side effects after consumption on human health. Stevia has many pharmacological and therapeutic applications as suggested by many preclinical and some clinical studies; these are nontoxic and possess antioxidant, antimicrobial, antifungal and anticarcinogenic activity. In future Stevia is likely to become a major source of high potency low calorie sweetener for growing natural food market. Stevia rebaudiana extract comes from the stevia plant, which originates in South America. The primary components extracted from the stevia leaf are called steviol glycosides.
