Abstracts

Stevia is an herbaceous perennial plant of the Asteraceae family. Stevia is a nutrient rich natural sweetest plant. The leaves naturally contain dulcoside, rebaudiosides A-F, diterpene glycosides stevioside, and steviolbioside which are responsible for its sweet taste. It is a plant which offers sweetness with fewer calories and do not show any side effects after consumption on human health. Stevia has many pharmacological and therapeutic applications as suggested by many preclinical and some clinical studies; these are nontoxic and possess antioxidant, antimicrobial, antifungal and anticarcinogenic activity. In future Stevia is likely to become a major source of high potency low calorie sweetener for growing natural food market. Stevia rebaudiana extract comes from the stevia plant, which originates in South America. The primary components extracted from the stevia leaf are called steviol glycosides.

Based on the Stevia Rebaudiana Extract market development status, competitive landscape and development model in different regions of the world, this report is dedicated to providing niche markets, potential risks and comprehensive competitive strategy analysis in different fields. From the competitive advantages of different types of products and services, the development opportunities and consumption characteristics and structure analysis of the downstream application fields are all analyzed in detail. To Boost Growth during the epidemic era, this report analyzes in detail for the potential risks and opportunities which can be focused on.

In Chapter 2.4 of the report, we share our perspectives for the impact of COVID-19 from the long and short term.

In chapter 3.4, we provide the influence of the crisis on the industry chain, especially for marketing channels.

In chapters 8-13, we update the timely industry economic revitalization plan of the

country-wise government.
