Abstracts

International financial transactions are based on several financing philosophies, whose application is affected by the course of economic growth and development within an individual national economy. This is demonstrated by the evolution of the financing technique known as International structured trade & commodity finance (STCF).

STCF is 'cross-border trade finance in emerging markets where the intention is to get repaid by the liquidation of a flow of commodities.' Structured commodity finance (SCF) is a sophisticated commodity-based financing technique, specifically designed for commodity producers and trading companies doing business in the developing markets. Introduced in the early 1990s, SCF continues to play an important role, providing liquidity management and risk mitigation for the production, purchase and sale of raw, semi-refined or semiprocessed materials.

Based on the Structured Commodity and Trade Finance market development status, competitive landscape and development model in different regions of the world, this report is dedicated to providing niche markets, potential risks and comprehensive competitive strategy analysis in different fields. From the competitive advantages of different types of products and services, the development opportunities and consumption characteristics and structure analysis of the downstream application fields are all analyzed in detail. To Boost Growth during the epidemic era, this report analyzes in detail for the potential risks and opportunities which can be focused on.

In Chapter 2.4 of the report, we share our perspectives for the impact of COVID-19 from the long and short term.

In chapter 3.4, we provide the influence of the crisis on the industry chain, especially for marketing channels.

In chapters 8-13, we update the timely industry economic revitalization plan of the country-wise government.
