## Abstracts

Terrazzo originated in Italy, where marble-workers would take the crumbs of their work home, mix them with cement and create faux-stone floors for their terraces. Since then, terrazzo floors have grown into an art form all their own with a wide range of styles and possibilities. Classic terrazzo is a mixture of marble fragments, called the aggregate, and a cementations binding agent, called the matrix. It is resilient and can be used inside and outside and it can be cast in place or laid in manufactured tiles.
