## Abstracts

Thermal transfer labels are used for product ID, record keeping, laboratory samples, board manufacturing, outdoor and refrigeration, and thermal transfer labels are ideal for printing long-lasting variable data. These labels are generally more durable than direct thermal, sheet-like inkjet or laser labels. Using reel labels and print ribbons, the technology uses less heat to transfer printed images than other methods, providing the widest range of materials. The widest range of adhesives are available to suit specific label applications. Well-matched ribbons and labels make printing adhesion very strong and usually do not require a protective film laminate.
